SUMMARY

Frontend Developer pursuing BCA (2024–2027), with hands-on experience building and deploying 8+ responsive websites using HTML5, CSS3, JavaScript, and Bootstrap. Experienced in WordPress development, Elementor-based CMS customization, and deployment workflows (Vercel, Netlify, Render). Currently expanding into React.js and AI-integrated web applications, including a weather assistant combining real-time APIs with conversational AI. Seeking an entry-level Frontend or Full-Stack Developer role.

CORE COMPETENCIES

Responsive Web Design	Cross-Browser Compatibility	UI Development	WordPress & Elementor
Version Control (Git/GitHub)	REST API Integration	Deployment & Hosting	AI-Integrated Web Apps

SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6), Bootstrap, Responsive Web Design, React.js (learning)
CMS & Design: WordPress, Elementor, Figma, UI/UX Design Basics
Tools: Git, GitHub, Vercel, Netlify, Render, REST API Integration

EXPERIENCE

- Web Development Intern — Sysslan IT Solutions** **Apr 2026 - May 2026**
- Built and modified responsive web pages using HTML5, CSS3, and JavaScript for live client projects
 - Improved UI consistency and mobile responsiveness across multiple pages
 - Collaborated with senior developers on real-world project workflows
- Freelance & Self-Taught Web Developer** **2024 - Present**
- Designed, developed, and deployed 8+ responsive websites using HTML5, CSS3, JavaScript, and Bootstrap, hosted on Vercel and Netlify
 - Customized WordPress themes (Elementor) for client websites, improving layout and performance
 - Managed domain/DNS configuration for client websites (GoDaddy)

PROJECTS

- Weather Companion AI — React / Vite / Tailwind Web App** **Live | GitHub**
- Built a weather application integrating the OpenWeather API with a conversational AI assistant for personalized recommendations; responsive UI built with React, Vite, and Tailwind CSS
- Scholar-Line — Educational Website** **Live | GitHub**
- Built and shipped a fully responsive educational website using HTML5, CSS3, JavaScript, and WordPress (Elementor); designed accessible, mobile-first layouts and deployed on Vercel
- Beauty — Service Booking Website** **Live | GitHub**
- Developed a responsive beauty service booking platform with an appointment scheduling UI using HTML, CSS, JavaScript, and Bootstrap; tested across devices and deployed on Netlify
